

## **FD ROOSEVELT/ TS ROOSEVELT NSCC UPDATED COVID 19 SAFETY PROTOCOLS 23 AUG 2021**

### **ALLCON:**

We will be following both National USNSCC protocols and the NAS Jacksonville/US Navy requirements for COVID safety. We have outlined these changes below. We anticipate that these protocols may change as the base protocols change and will update you as this occurs.

### **Changes to our COVID 19 safety and reporting protocols:**

- We will no longer be temperature testing all cadets or taking in signed Daily Symptom Forms for each drill.
- Masks will be worn indoors for ALL regardless of vaccination status until further notice. Cadets should come prepared with a mask.
- Masks will NOT be required outside. Prescribed distancing will be implemented.
- COVID-19 can take 2-10 days for transmission to another person. If a cadet is having to quarantine at school, they should NOT come to drill, period. Also, any symptoms? STAY HOME!
- Cadets developing symptoms during drill be will handled by our adult medical staff and separated from the unit until they can be picked up.
- Hand sanitizer and other cleaning procedures will remain in place.

### **Procedures for First Drill ONLY – 28 AUG 21:**

We will be requiring an updated Attestation Form for all cadets at the FIRST drill only. (Attached)

Procedures for first drill check-in:

- Cadets will use the drive-through drop off procedure from last year
- At the front of the line, a staffing cadet/adult will verbally confirm the questions in BOLD on the attached form. Parent and cadet will sign and the cadet can join their unit.
